

Md Arif Fuad Akash

Full-Stack Software Engineer — Fintech & Payment Systems

+46 76 085 01 79 | fuadakash0430@gmail.com | Stockholm, Sweden | [Portfolio](#) | [LinkedIn](#)

PROFILE

Full-stack Software Engineer with two years of fintech experience building mission-critical POS, kiosk, and payment infrastructure for major banking and card networks, including Visa, Mastercard, and UnionPay. Strong background in Java/Spring Boot, PHP/Laravel, and JavaScript (React/Vue.js), with hands-on expertise in ISO 8583 transaction processing and Android-based payment hardware (PAX, Landi, Topwise). Currently pursuing an MSc in Information Systems at Uppsala University, combining production engineering experience with a growing focus on scalable system design.

TECHNICAL SKILLS

Languages: Java, JavaScript, PHP, C#, C++, Python

Frameworks & Libraries: Spring Boot, Laravel, ASP.NET Core, React.js, Vue.js, Node.js, Flutter, Bootstrap

Payments & Web Standards: ISO 8583, REST APIs, JSON, HTML/CSS, XML

Tools & Platforms: Git/GitHub, Docker, MySQL/SQL, Postman, Firebase

PROFESSIONAL EXPERIENCE

Application & Software Engineer

ADN Technologies Ltd. — Dhaka, Bangladesh • Oct 2024 – Aug 2026

- Architected full-lifecycle Android POS terminal apps across multiple hardware brands (PAX, Morefun, Landi, Topwise), ensuring robust deployment and full ISO 8583 compliance.
- Integrated and validated core payment processing with major card networks — Visa, Mastercard, American Express, UnionPay, and NPSB — achieving 100% reliability during bank server validation.
- Built end-to-end self-service kiosk applications for retail and restaurant ordering (PAX SK700/SK300, Topwise SK200), pairing terminal hardware integration with a custom backend API for real-time billing and order management.
- Led development of a real-time Payment SoundBox system for bKash mobile banking (PAX CS35/CS70/CS85), including its centralized management portal.
- Engineered a digital receipt management portal in Spring Boot, securing transaction data pipelines and real-time communication between commercial banks and their clients.
- Co-developed a large-scale Enterprise Management System and ticketing platform in Laravel, streamlining cross-functional issue tracking, and led R&D across hardware SDKs for cross-device integration spanning kiosks, POS terminals, and IoT sound boxes.

Software Development Intern

Business Automation Ltd. — Dhaka, Bangladesh • Feb 2024 – Apr 2024

- Contributed to web development projects using PHP, SQL, and JavaScript, building a practical foundation in full-stack software engineering.
- Completed the internship with a formal assessment certification recognizing proficiency in core development skills.

EDUCATION

MSc in Information Systems

Uppsala University — Uppsala, Sweden • Aug 2026 – Jun 2028 (expected)

BSc in Computer Science and Engineering

University of Liberal Arts Bangladesh — Dhaka, Bangladesh • Feb 2020 – Nov 2024

- CGPA: 3.48/4.00 (140 credits); minor in Business Administration.
- Thesis: “IoT-Based Phytoplankton and Zooplankton Growth Monitoring System for Smart Aquaculture” (see Publications).

PUBLICATIONS

“IoT Driven Phytoplankton and Zooplankton Growth Monitoring System for Smart Aquaculture”

28th International Conference on Computer and Information Technology (ICCIT), IEEE — 2026

HONORS & AWARDS

Duke of Edinburgh's International Bronze Award: The Duke of Edinburgh's Award Foundation Bangladesh, Nov 2024 — completed 13+ weeks each of community service, physical activity, and skill development, culminating in a self-sufficient team expedition.
